RANGE

Restore your home to its former glory with windows and doors designed to enhance period properties

This colour panel is printed as a close match to the window frame colour option of: **Dark Red (Halo and VEKA)**

RECREATE THAT ORIGINAL CHARACTER...

When it comes to choosing new windows and doors, you don't have to sacrifice safety and warmth for style and elegance. With the Heritage Range you can have the best of both worlds - combining kerb appeal with the very latest in glazing innovation.

A perfect alternative to high-maintenance timber products, the Heritage Range combines classic charm with contemporary comforts, giving you the ultimate in traditional-look windows and doors. From stellar security performance to exceptional energy efficiency, our windows and doors can restore original features or add character to your home.

Our Heritage Range includes the stunning portfolio from The Residence Collection, as well as an exciting array of profile choices and finishes from the world-renowned VEKA and Halo portfolio.

An elegant collection of high-quality, low-maintenance windows and doors to transform your house into a home.

THE LOOK AND FEEL OF WOOD - MINUS THE MAINTENANCE

Enjoy the benefits...

- Technologically-advanced with modern design and safety features.
- Virtually maintenance-free with a 10 year guarantee.
- Thermally efficient for a warmer home.
- Designed to replicate traditional timber windows and doors.
- Multipoint locking security to BSI Group PAS 24 (2016) requirements.

Conservation

Conservation areas are protected by law against 'undesirable changes' due to their status as regions of 'notable environmental or historical interest or importance.' To preserve the unique character of these areas, the installation of new windows and doors is subject to guidelines known as Article 4, and planning permission should be sought from the local authority. The Heritage Range includes windows from VEKA which are sympathetic to conservation area requirements, as well as the R9 from The Residence Collection which has been designed specifically to meet Article 4 directives.

WEATHER RESISTANT

SAFE AND SECURE

WER A⁺⁺ RATED

0.74 W/(m²K) U-VALUES

The Heritage Range of windows delivers outstanding weather resistance, security and energy efficiency.

Window Energy Rating (WER) and U-value figures based on R9 with 44mm triple glazing, R7 can achieve 0.84 U-value. Halo flush sash can achieve 1.3 U-value. VEKA vertical sliding sash can achieve 1.4 U-value with 28mm glazing.

HERITAGE RANGE

HALO FLUSH SASH WINDOWS

History and Heritage

The Halo flush sash has been designed to replicate the look of timber windows and is ideal for heritage homes, particularly where authentic looks are all important. Sitting flush within the frame, these windows have an understated and traditionally elegant appearance.

Crafted from modern, weatherproof uPVC, Halo flush sash windows can be specified in bespoke sizes to suit those in your home. Georgian bar detailing can also be fitted within your windows to give the 'lattice' effect often found in historic homes.

However authentically timber-like these windows may look, they offer a deceptively modern performance. Your home will be a haven of warmth and quiet, thanks to the thermal insulation of Halo flush sashes with their multi-chamber internal construction for increased energy efficiency.

Halo is part of VEKA - one of the world's leading uPVC systems suppliers.

Outside: window sits flush within the frame with welded or Timberweld joint.

Inside: profiled finish - sculptured or chamfered.

- 70mm deep profile with 5 chambers in the sculptured system and 3 chambers in the chamfered system.
- Available in a range of colours - including different colour on the outside to the interior.
- Heritage style hardware.
- Triple glazing option.
- Chamfered or sculptured internal beading.
- Mitre weld joint or Timberweld®.
- Chamfered flush sash is available in the Spectral ultramatt foil range.

Heritage style hardware options - see page 18

HERITAGE RANGE

Where you choose a Timberweld joint the sashes will be Timberweld with mechanically jointed outerframe, transoms and mullions.

R7 FLUSH SASH WINDOWS

Beautifully flush inside and out

R7 (Residence 7) is part of The Residence Collection of high performance windows that are designed and made in Britain.

R7 flush sash windows are a versatile and appealing option for a wide range of homes, from period properties to more recently built houses. Beautifully flush inside and out, the elegant design features integral to the collection give R7 timeless appeal.

With a 7 chamber frame profile for superior thermal, acoustic and security performance, R7 windows outperform many other systems on the market and are available in a range of other styles, including casement windows, shaped windows and bay and bow windows.

Expertly crafted in a variety of colours, the R7 collection is also virtually maintenance-free, so you spend less time on upkeep and more time doing the things you love.

- 75mm deep profile with 7 chambers.
- Choice of 14 different colours - including different colours on the outside to the interior.
- Heritage style hardware.
- Butt hinges (dummy or working) option.
- Triple glazing option.
- Decorative beading.
- Mitre weld joint or Timberweld®.

HERITAGE RANGE

R9 FLUSH SASH WINDOWS

Classic with a twist

The R9 collection combines a traditionally flush exterior with a stylish decorative interior to achieve its classic appearance.

Created for homeowners looking to authentically replicate 19th century timber frames, it works for both period properties and contemporary homes alike. Crafted from virtually maintenance-free materials, R9 has been specifically designed to help meet the stringent guidelines set by local authorities in conservation areas.

Breathtakingly elegant, R9 combines the best of 19th century British architecture with all the benefits you'd expect from modern uPVC and glazing. The thermally-efficient 9 chamber design retains the character of your home, while keeping you in a safe, warm and tranquil environment.

Authentic butt hinge

Traditional style weatherbar

'Easy clean' rebate

- 100mm deep profile with 9 chambers.
- Choice of 11 different colours - option to choose one colour for the outside and another for the interior.
- Heritage style hardware.
- Butt hinges (dummy or working) option.
- Triple glazing option.
- Timberweld® joint as standard.

Where you choose a Timberweld joint the sashes will be Timberweld with mechanically jointed outerframe, transoms and mullions.

RANGE

VEKA VERTICAL SLIDING SASH WINDOWS

Style and efficiency

Traditional timber sash panes can make you think of cold, draughty and difficult to open or close windows. With VEKA's modern and efficient vertical sliding sash option, the problems associated with the old wooden types are eliminated.

Your home can retain its original good looks while you enjoy the smooth operating, secure-locking, heat-saving and sound-insulating benefits of beautifully engineered windows - without the need to rub down, paint and restore them in the future. These stylish windows are also available mechanically jointed to replicate original timber frames.

- Multi-chamber profile for great thermal and sound insulation.
- Available in a range of colours - including different colour on the outside to the interior.
- Heritage style hardware.
- Triple glazing option.
- Sculptured internal beading.
- Locking options including upgrade to Secured by Design standards.
- Available mechanically jointed.

COMPOSITE DOORS

A stunning and secure entrance to your home

Enjoy the traditional look of timber without any of the drawbacks.

Our Heritage Range of composite doors offers the traditional good looks of timber without any of the drawbacks. While wood may crack, split or warp and requires regular sanding and repainting, uPVC needs very little maintenance and provides all the security, durability and energy efficient performance you'd expect from modern materials.

Offering you the following benefits:

- Tough and durable, highly scratch-resistant finish.
- Reinforced, thermally-efficient core.
- Hard-wearing construction using modern weatherproofing technology.
- Precision-engineered hinges and hardware.
- Virtually maintenance-free.
- Secure locking with high security option to Secured by Design standards.
- Choice of door and glazing designs.
- Wide range of colours and door and frame colour combination options.
